Contract Review

Contract Name	METAGAMEWORLD
Compiler Version	v0.7.6+commit.7338295f
Optimization	200 runs
Licence	None
Explorer	https://bscscan.com/token/0x9388bc1afe73748fe e2f5e965d8bf33de0b3fca0
Symbol	MGW
Decimals	9
Total Supply	100.000.000.000 MGW
Website	https://www.metagameworld.org/

Audit Updates

Initial Audit	25.05.2022
Corrected	01.06.2022

Contract Analysis

Pass	Resolved	Description
✓		Contract Owner is not able to mint new tokens
✗	✓	Contract Owner is not able to burn tokens from specific wallets
✗	✓	Contract Owner is not able to increase fees more than a reasonable percent (25%)
✗	✓	Contract Owner is not able to stop or pause transactions
✓		Contract Owner is not able to transfer tokens from specific address
✓		Contract Owner is not able to increase the amount of liquidity taken by dev wallet more than a reasonable percent
✓		Contract Owner is not able to blacklist wallets from selling
✓		Liquidity Pool is locked

ST - Stop Transactions with Locked Flag

Criticality	high
Location	https://bscscan.com/token/0x9388bc1afe73748fee2f5e965d8bf33de0b3fc0
Status	Resolved

Description

The contract owner has the authority to stop transactions. The owner may take advantage of it by setting the `locked` to zero.

```
function transferLock() public onlyOwner {
    locked = true;
}
```

Recommendation

The team should carefully manage the private keys of the owner's account. We strongly recommend a powerful security mechanism that will prevent a single user from accessing the contract admin functions. That risk can be prevented by temporarily locking the contract or renouncing ownership.

Resolved

The team locked the contract and has no longer access to owner functions. The contract will be locked until 10 January 2022

<https://bscscan.com/token/0x9388bc1afe73748fee2f5e965d8bf33de0b3fc0>

ST - Stop Transactions with Max Amount

Criticality	high
Location	https://bscscan.com/token/0x9388bc1afe73748fee2f5e965d8bf33de0b3fca0
Status	Resolved

Description

The contract owner has the authority to stop transactions for all users excluding the owner. The owner may take advantage of it by setting the `_maxTxAmount` to zero.

```
if(from != owner() && to != owner())
    require(amount <= _maxTxAmount, "Transfer amount exceeds the maxTxAmount.");
```

Recommendation

The team should carefully manage the private keys of the owner's account. We strongly recommend a powerful security mechanism that will prevent a single user from accessing the contract admin functions. That risk can be prevented by temporarily locking the contract or renouncing ownership.

Resolved

The team locked the contract and has no longer access to owner functions. The contract will be locked until 10 January 2022

<https://bscscan.com/tx/0x7bd85dd8c8c7c77a52d0e49c10a7044c5a9296606b8383d85f30a785d897da69>

UIF - Unlimited Increase Fees

Criticality	high
Location	https://bscscan.com/token/0x9388bc1afe73748fee2f5e965d8bf33de0b3fc0
Status	Resolved

Description

The contract owner has the authority to increase fees without limit. The owner may take advantage of it by calling the `setTaxFee` function with a high percentage value.

```
function setTaxFee(uint256 _newTaxFee) public onlyOwner {
    require(_newTaxFee != 0, "newTaxFee can not be Zero amount");
    _taxFee = _newTaxFee;
    _previousTaxFee = _taxFee;
}
```

Recommendation

The contract could embody a check for the maximum acceptable value.

The team should carefully manage the private keys of the owner's account. We strongly recommend a powerful security mechanism that will prevent a single user from accessing the contract admin functions. That risk can be prevented by temporarily locking the contract or renouncing ownership.

Resolved

The team locked the contract and has no longer access to owner functions. The contract will be locked until 10 January 2022

<https://bscscan.com/token/0x9388bc1afe73748fee2f5e965d8bf33de0b3fc0>

BT - Burn Tokens

Criticality	high
Location	https://bscscan.com/token/0x9388bc1afe73748fee2f5e965d8bf33de0b3fca0
Status	Resolved

Description

The contract owner has the authority to burn tokens from a specific address. The owner may take advantage of it by calling the `burn` function. As a result the targeted contract address will lose the corresponding tokens.

```
function burn(address _from, uint256 _amount) public onlyOwner {
    _burn(_from, _amount);
}
```

Recommendation

The owner should carefully manage the credentials of the owner's account. We advised considering an extra-strong security mechanism that the actions may be quarantined by many users instead of one. The owner could also renounce the contract ownership for a period of time or pass the access to the zero address.

Resolved

The team locked the contract and has no longer access to owner functions. The contract will be locked until 10 January 2022

<https://bscscan.com/tx/0x7bd85dd8c8c7c77a52d0e49c10a7044c5a9296606b8383d85f30a785d897da69>
